

## Swing Door Finger Protection

(p/n 10414)

The finger guard is a roller blind type swing door finger protector that is designed to prevent injuries caused by fingers getting trapped in doors. It is available in two lengths, 1,925mm and 2,015mm and the specially designed roller type blind ensures constant tension as the door moves, preventing fingers from inadvertently getting crushed in closing swing doors .

This finger guard is made of durable and rust-free materials suitable for both indoor and outdoor use. The synthetic fiber fabric used in the finger guard is washable and hard-wearing, and has been tested for durability up to 1,000,000 test cycles. The finger guard's fabric cover is removable and mountable for easy maintenance and cleaning, and it is B1 rated fire resistant for added safety.

Overall, this finger guard provides high levels of safety, durability, and maintenance-free operation, making it an excellent choice for door protection in a variety of settings.
